

2008ICT Design Thinking in IT

Assessment 2: Website (40%)

DEADLINES: During Week 12 or EOD Friday Week 12 (See below)

Aim: Knowledge of web technologies is delivered in the course workshops. The design from Assignment 1 will be developed into a functioning website. This assessment will evaluate the final website and will be marked according to the following marking criteria. The aim is to produce a front-end website using a suitable technical framework. Includes a demonstration/presentation of the completed website. Includes website code, website demonstration and "Pitch video" explaining the design and security needs of website.

Deliverables:

- Team: Each team will upload the code of their website (Zip file) **EOD Friday Week 12**
- Team: Each team will demonstrate their website. **During Week 12.**
- Team: Each team will upload a Pitch video (MP4 file). **EOD Friday Week 12**
- Individual: Each student will upload a completed peer review document template (PDF file). **EOD Friday Week 12**

SYSTEM (/50)	Absent or poor	Below average	Average	Good	Excellent	MARK
Website implementation /30	0-7: No or very limited evidence of website implementation. Limited engagement with project topic.	8-14: Some evidence of website. Very simple, limited in scope, little evidence of testing, limited working website. Website based on a template. No demo.	15-20: Evidence of implemented website using CSS. Some minor errors in either system coverage and/or quality of evaluation/testing. Dev features in journal.	21-25: Good use of web design principles and standards. Use of flex/grid for layouts. Clear time allocation in journal.	26-30: Excellent responsive website. Evidence of significant coverage of project aims. Robust, extendable and maintainable website.	
Code quality /20	0-4: Poorly structured code. Limited comments and little use of version control tools.	5-9: Lack of obvious good coding standards. Inconsistent coding between system components. Ad hoc commenting. No demo.	10-13: Adequate use of coding standards. Coding inconsistent to project documentation. Code activities in journal. Complete website uploaded as a ZIP file.	14-17: Overall good code. Some minor issues on comment quality or consistency. Clear time allocation in journal.	18-20: Excellent code. Excellent separation of components and clear mapping to project documentation. Consistent and detailed comments.	

DEMONSTRATION (/30)	Absent or poor	Below average	Average	Good	Excellent	MARK
Delivery /30 <i>(Also see footer below *)</i>	0-7: Poor delivery, member absent from demo and/or limited demonstration. One or more of: overlong presentation component, excessive note reading.	8-14: Below average delivery of system demonstration. One or more of: lack of flow in demonstration/poorly structured, stilted delivery, limited focus on the project.	15-20: Adequate delivery of system demonstration. Well-structured presentation with only minor issues in delivery or lack of focus on project topic. All team members participated.	21-25: Good demonstration. Only minor reliance on notes. Good engagement with audience. Some minor issues with timing and/or use of presentation tools. Demo practise noted in journal	26-30: Confident and engaging team-based demonstration. Well practiced demonstration. Comprehensive and detailed delivery.	

PITCH VIDEO (/20)	Absent or poor	Below average	Average	Good	Excellent	MARK
Overview (/15)	0-3: No or poorly presented overview. Poor knowledge of website. Limited overview of design/security issues	4-7: Some evidence of website design and reflection on security needs. Not pitched to appropriate audience.	8-11: Adequate overview of website design. Some minor errors in coverage and overly general description. Video activities in journal.	12-13: Good knowledge of current system, its design and any current issues. Clear reflection on security issues and mitigations	14-15: Excellent knowledge and highlighting of current website and its design. Appropriate overview of security issues.	
Video quality (/5)	0-1: Major errors in video material including one or more of the following: spelling errors, grammar errors, formatting errors, unfinished elements.	2: Very basic video with some errors including poor integration between elements. Clearly not practised.	3: Clear but simple video. Minor errors in either video content or coverage but consistent and well-presented.	4: Good quality video. Appropriate timing and focus. Consistent and well-presented video.	5: High quality and professional looking video.	

Weighting Factor (100)	Absent or poor	Below average	Average	Good	Excellent	WF
Course engagement /100	0-39: Poor course engagement. Missing course elements. Missing team meetings. Poor diary entries. Limited team contributions. Poor peer review. No peer review submitted.	30-49: Limited course engagement. Mixed quality in diary entries. Limited team involvement. Mixed peer review.	50-69: Adequate course engagement. Individual peer review submitted, diary entries submitted, evidence of workshop engagement. Valued team member.	70-89: Good course engagement. Detailed peer review, diary entries submitted on time, most workshops completed, Valued team member.	90-100: Excellent engagement with the course across all elements.	

Website Mark _____ * Weighting Factor _____ = Total Mark (%) _____

ADDITIONAL FEEDBACK:

NOTE: Submissions after the **deadline** will have marks reduced by **5% per day** late. (The weekend counts as 2 days.). Also we recognize in group work that sometimes not everyone contributes equally to the group tasks. * **Team members will need to attend the demonstration to be eligible for these marks.** Although groups receive a single mark for their submission, **we reserve the right to vary individuals' marks based on peer feedback from other group members and feedback received from course staff.**
